# Armilla 1.0 — Press Fact Sheet

**Ten traditions, one deterministic chart engine, and cited AI readings tracing every chart claim to its source.**

### What It Is & Who It Is For

- **Ten systems:** Named for *armilla* and *xuán jī* (璇玑), **Armilla** computes six charts—BaZi (Four Pillars), Zi Wei Dou Shu, Western & Vedic astrology, Energy Blueprint, numerology—plus the I Ching, psychometrics (16 Types, Enneagram, Big Five, attachment style, values, DISC), and Hand & face (vision model, opt-in, adults only).
- **Spaces & users: Charts** (offline cycles), **Readings**, **Life Map** (past & 10-year timelines), **People** (6-axis pair & 3–8 group charts, never one score), **Today** (prompt, ~30s journal), **Ask** (cited Q&A)—for students, self-explorers, people at turning points, couples, families, founders, and pros (**Pro** web workspace).

### What Sets It Apart

- **Verified Rust engine:** Pure Rust astronomy (VSOP87, ELP2000-82B/MPP02, Meeus), IANA time zones/DST, true solar time, minute-accurate solar terms, and lunar leap months—offline on phones (UniFFI) and WebAssembly; zero differences across 1,079 reference birth moments.
- **Cited AI, zero math:** Armilla sets per feature whether OpenAI or Google's Gemini serves it (users do not choose; neither trains on what it receives): for text features (readings, Ask, today's guidance, and birth-time inference questions and reasons), the provider receives computed chart data and the question (never names, birth date, birth time, or birthplace), plus journal and life-event text only when "Let AI read my life events" is turned on; for Hand & face, it receives palm or face photos only after separate consent. Every chart claim cites a tappable element; unsourced lines are stripped.
- **Lived proof:** Convergence dots mark cross-system agreement; logged events track accuracy. **Birth-time inference** narrows unknown hours via family clues, 5+ events, distinguishing questions, and optional Hand & face reference (AI-assisted or local; tiered confidence from simulated backtest, no hit rate claimed).
- **Privacy & limits:** No account for charts/export/journal; passwordless login; synced journal entries, life-event notes, and life-event photos use E2E encryption; palm and face photos for Hand & face are uploaded after separate consent to the user's private cloud storage so the AI provider's vision model can read them (not E2E encrypted, deletable at any time); in-app export/delete. **Never predicts:** death/lifespan, illness/diagnosis, disasters/accidents, lawsuit outcomes, specific investments, or lotteries/gambling (nor health/lifespan in Hand & face); no ritual goods or ads.

### Availability & Pricing

- **Platforms:** iPhone-only (iOS 26+) App Store · Coming soon · Android 9+ Google Play · Coming soon · Web https://armilla.arcturatech.com. Free download; one account across all three; English, Simplified & Traditional Chinese (Privacy/Terms in English); 174 App Store territories & Google Play (not mainland China). Store name: **Armilla**.
- **Plans (USD; local currency; 7-day yearly trial; no weekly): Free ($0):** offline charts, export, 6 Brief/day, Ask (3/day), decade Life Map, 3 profiles, journal. **Plus ($9.99/mo · $59.99/yr):** Full/custom & 4 Long/mo, full Life Map, unlimited Ask, full pair, 30 profiles, 1 annual report & inference/yr. **Family ($16.99/mo · $99.99/yr):** Plus for 6 accounts, 3–8 charts, family space, 60 profiles, 3 inferences/yr. **Pro ($29.99/mo · $239/yr):** Web workspace (1,000 clients, 12-person, white-label PDF, JSON; no API), 30 Long/mo, unlimited reports/inferences (fair use).
- **One-time (no subscription):** In-depth Essence Report ($29), In-depth Pair Report ($19), Family / Team Report ($39), Parent & Child Report ($29), Year-Ahead Report ($19), Business Partner Report ($29), Long Reading ($4.99), Birth-time Inference ($19, 30-day session).
